3. We understand that claims 1-28, 34-39, 44-51, and 53-83 are currently pending in U.S. Patent Application No. 09/913,667, and that these claims are rejected as allegedly being anticipated (under 35 U.S.C. §102(e)) by the teachings of Bonner *et al.*

4. We are the inventors of "a method of microdissection and analyzing proteins of interest" in a population of extracted cells that is disclosed, but not claimed, in Bonner *et al.* and claimed in the '667 application. To the extent that Bonner *et al.* discloses but does not claim "a method of microdissection and analyzing proteins of interest," that subject matter is our own work and not that "of another."
